
POWER YOUR OPERATIONS WITH THE SOLAR EDGE

Get more from your genset. Mantrac's proven solar technology allows you to save costs and tap into an unlimited supply of energy for uninterrupted power.

INTEGRATING RENEWABLE ENERGY INTO YOUR POWER SOURCES

Your business already uses gensets or the grid for power. But your ideal operation could achieve significant cost reduction with renewable energy integration.

Reliable Power supply

Save money as the sun shines

Longer equipment lifespan

Longer performance cycles for lower OPEX and increased lifetime value

Lower operational costs

Decrease fuel or grid dependency and offset costs by a large margin

Reduced emissions

Eco-friendly technology for simpler compliance with regulations

Lower operational costs and higher uptime

KEEP OPERATIONS RUNNING WITH UNMATCHED PERFORMANCE

When you enhance your power generation technology with Cat® solar photovoltaic (PV) solutions and Energy Storage, you maximise your return on investment in the shortest possible time frame.

Unmatched performance

Best in-class technology: Latest PV technology engineered to work with your existing power set up

Reliable: Designed to be roof or ground mounted, our PV solutions are built to last a lifetime

Intelligent: Cat Microgrid controllers allow you to switch to the cheapest energy source at all times

Industry-leading warranty: Rigorously tested for life and stress, Cat PV panels come with a 25 year performance warranty

SOLAR SOLUTIONS TAILORED TO SPECIFICATIONS

Cat solar solutions serve various industries, in multiple configurations, with proven durability over decades.

Technology

Cat photovoltaic modules:

Cat Monocrystalline, Bifacial or Thin film panels can be engineered to be roof or ground mounted

Cat Microgrid Master Controllers (MMCs)

MMCs seamlessly integrate traditional gensets and renewable energy sources while providing:

- Real-time monitoring
- Control of assets in a common location or over a wider area
- Switching between generators, grid, solar and energy storage

Configurability

System configurability:

- Depending on your needs, Cat solar panels allow us to recommend various systems: grid-tied, photovoltaic-diesel hybrid, off-grid, microgrid

Upgradability

- Cutting-edge design and technology that allows for upgrades and additions when you need them.

MANTRAC CAN MAXIMISE YOUR SOLAR UPGRADE

We support your operation, starting with product selection, design and commissioning, through installation and after-sales service.

Choice of service level

We put the entire system together for you, or we can tailor services:

- Design
- Installation
- Financial analysis
- Consultation

Flexible Systems

Designed to work around your existing power set up:

- Stand alone PV systems
- Ability to work with non-Cat generators

Financing

Minimise upfront costs:

- Take advantage of tailored financing solutions
- Power Purchase Agreements: Pay a set dollar amount per kWh over a contract period

Operation & maintenance

Lifecycle support:

- Choice of service level and regular maintenance
- One stop shop for all component warranty claims

A MANTRAC CASE STUDY

SOLAR SOLUTIONS: TOURISM INVESTS FOR THE FUTURE

SOLAR SOLUTIONS: TOURISM INVESTS FOR THE FUTURE

Future Group Travel was in need of an independent, reliable power source, and Mantrac took the lead in providing a sustainable power generation solution with solar.

Scope of work

Create a solar microgrid with minimal OPEX

Complete commissioning with civil design and execution

Design and install associated structures for the PV panels

Complete electro-mechanical installation

Accomplish project in an environment with varying temperatures

SOLAR SOLUTIONS: TOURISM INVESTS FOR THE FUTURE

Solution

- Commission a micro-grid 1.5 MWp ground-mounted Solar solution integrated to Cat generators
- In 3 days, source and deliver to site: PV panels, totalising panel, mounting structures, adaptation panels, power and control cables
- Develop a cloud forecasting system to start up generators before clouds pass

Impact

**2,985
mWh/year**
power generation

**30%
less**
fuel consumption

**805,000
litres/year**
diesel fuel saved

**2,093 tons
reduction**
in CO₂ emissions

**4,475 kg
reduction**
in NO_x emissions

**1,182 kgs
reduction**
in sulphur emissions
