MANTRAC

CAT[®] LIFT TRUCKS A WORLDWIDE REPUTATION

People recognize the Caterpillar and Cat[®] names across the globe; from earth-moving and construction equipment, through engines and power generation systems, clothing and footwear, to materials handling equipment, Cat products are renowned for their quality and fitness for purpose.

For over 60 years, Cat lift trucks have been designed and built to embody these Caterpillar family brand values and to perform in the toughest environments and extremes of temperature - giving fleet managers the confidence to specify Cat lift trucks and warehouse equipment in a wide variety of industries and applications.

But we never rest on our laurels. We understand that efficient materials handling is achieved by maximizing productivity for the lowest possible total cost of ownership.

That's why our research and development programs continue to deliver new and improved products with greater performance and longer service intervals to keep pace with the ever-changing needs of industries around the world.

Engine powered lift trucks

Diesel

Designed and built for dependable performance in any application, our range of diesel powered lift trucks are suitable for even the harshest environments.

Advanced engine powered technology offers the levels of performance necessary to meet the requirements of modern business. Each truck includes the easy-to-use features common to every Cat lift truck, meaning that operators can move from truck to truck, without the need to re-familiarize. And a range of optional extras ensures that you can choose the configuration best suited to your needs.

LP gas

The LP gas range ensures that we can offer suitable solutions for both indoor and outdoor applications, and LP gas offers an attractive alternative to regular diesel as it provides power and torque with minimal emissions and excellent fuel economy.

Diesel range: 2.0 – 10.0 tonne capacity

LP Gas range: 1.5 – 5.5 tonne capacity

Electric powered lift trucks, warehouse trucks and Tow trucks

Electric powered lift trucks

Our complete range of electric pneumatic and cushion tire lift trucks deliver controllable, programmable performance for the safe handling of different loads such as glass, plastics, bricks, etc.

AC power has increased productivity, lengthened shifts and simplified maintenance routines to improve productivity in heavier applications and more demanding conditions and extremes of temperature. With a range that includes 48V 3- and 4-wheel workhorses and heavy duty 80V units, Cat Lift Trucks boast one of the most modern and complete product ranges in the industry.

A complete warehouse range

Our broad range of dedicated warehouse equipment incorporates power pallet trucks, stackers, reach trucks and order pickers. Each machine is designed and built for dependable performance, long shift life and minimum maintenance downtime.

The range covers every warehousing application, including demanding environments and operation in extremes of temperature, such as cold stores.

Electric range: 1.4 – 5.0 tonne capacity

Our power pallet and stacker trucks include pedestrian, stand-on, stand-in and sit-on variants for maximum flexibility in the loading bay, while the reach trucks include multi-way models for specialist handling. Our range of order pickers includes a number of models designed for picking from the first two levels, as well as machines for medium and high bay applications.

Tow truck

We strive to offer a solution for many areas of materials handling. The NTR30-50N2 is the tow truck of choice for many indoor towing applications, particularly in the automotive industry. It incorporates many built-in features which combine to provide the operator with a top quality, stressfree working environment.

Whatever the product you handle, whichever way your warehouse operates, whatever racking configuration you have in place, there's a Cat Lift Trucks solution just waiting to help you optimize warehouse efficiency and your return on investment.

Hand / Power Pallet range:
1.2 – 2.5 tonne capacity

Stacker range:
1.0 – 2.0 tonne capacity

Order Pickers: 1.0 – 2.5 tonne capacity

Reach Truck range:
1.4 – 2.5 tonne capacity

Multi-Way Reach Trucks:
2.0 & 2.5 tonne capacity

Man-Up Turret Truck:
1.1 – 2.0 tonne capacity

Tow Truck:
3.0 – 5.0 tonne capacity

THE BEST TRUCK FOR EVERY JOB...

Cat® Lift Trucks is one of the leading manufacturers of vehicles for materials handling, including a variety of engine powered lift trucks covering every application – even in the harshest environments. Stylish, durable and well-designed, yet cost-effective and hard working, with an excellent dealer network delivering local support to guarantee you years of trouble-free service.

The diesel models have the power to cope with the challenge of outdoor conditions and demanding duty cycles, whilst the LPG models are flexible enough for use both indoors and outdoors. The range of 1.5 to 5.5 tonne engine powered trucks includes many features that make them even more dependable, cheaper to run, simpler to maintain and easier to use, which means greater productivity – and profitability – for you.

DIESEL MODEL RANGE

MODEL	CAPACITY (kg)	LOAD CENTER	WHEEL BASE	PAGE
DP20N3	2000	500	1600	4

SPEC SHEET

1.5 - 3.5 TONNES DURABLE, CONSISTENT, RUGGED...

Our smaller range of engine powered trucks offer an excellent blend of power and performance with the advantage of low fuel consumption, making them easy and economical to use.

With a variety of load capacities, frame types, mast designs and engine sizes to choose from, you can be sure of the ideal configuration to suit your needs.

Ideal for industrial applications, the trucks achieve outstanding traction on sloping or slippery surfaces, with solid pneumatic tyres providing excellent operator comfort.

A built-in warning system and easy maintenance procedures help to keep your truck in service and your costs to a minimum.

A wide range of features allows you to match the specification of your Cat lift truck to your application. A double air filter, for example, is fitted to provide increased protection for the engine in dusty applications such as in mills and brick yards, or the optional lifting eyes can be attached to enable the truck to be hoisted on to a ship or lorry for port-based or mobile use.

The DP models are equipped with powerful, industrial strength, dependable and easy to service diesel engines with low emissions and fuel consumption. Our latest Stage V diesel engine, with its advanced exhaust gas technology, meets stringent EU regulations.

The GP models are equipped with the GCT GK21E and GCT GK25E engines. These proven, high powered and clean LPG engines, with standard 3-way closed loop catalytic converter, provide the performance and torque necessary when trucks are required for use in demanding applications indoors and outdoors.

SPEC SHEET

1.5 - 3.5 TONNES

Regardless of the application expectation, these compact engine powered models have deservedly acquired a name synonymous with durability.

The stylish exterior contains a truck built to last. The high air intake, strong fan cooling and enhanced dust filters make these amongst the most dependable vehicles available.

Add proven, ergonomic features such as finger-tip hydraulic controls and you have a tool that will continue to repay your investment over and over again.

STANDARD FEATURES

- Inviting operator compartment with excellent all round visibility.
- Powerful, dependable, easy to service engines with low emissions and fuel consumption.
- Vehicle Control Module manages various truck and operator functions allowing easy trouble shooting and pin pointing of problems.
- Dual element cyclone air filter with high air intake reducing maintenance.
- PowerShift transmissions that are easy to operate and service.
- Hydrostatic steering for increased productivity.
- LCD display provides extensive information on truck operation and maintenance state. It also indicates service requirements to prevent unexpected down time and cost due to unscheduled maintenance and service.
- Presence Detection System (PDS) prevents truck operation when operator is not seated.
- LED lights on the front work lights and front/rear combination lights reduce energy consumption and maintenance costs.
- Automotive style brake system, self energising and self adjusting.
- Double action parking brake with audible alarm.
- Catalytic converter to further reduce exhaust emissions.

OPTIONAL FEATURES

- Fingertip hydraulic controls mounted on a fully adjustable armrest for optimum load handling and easy maneuverability.
- Deluxe cabin options.
- Wide range of masts.
- Hydraulic valves and piping to control auxiliary attachments.
- Elevated exhaust.
- Cooling options like coolant level warning, anti clogging radiator and "easy to clean" dust proof net to cope with dusty and dirty applications.
- Tyre options like pneumatic tyres for special surfaces and dual tyres for even better capacity or lower ground pressure.
- Power-line options like drive shaft protection, torque converter temperature warning and special dust protection breathers.

SPEC SHEET

4.0 - 5.5 TONNES

These larger engine powered models are designed for heavy duty applications and are the natural choice for use in ports, construction, freight, and metal and brick operations.

With exceptional endurance and power they effortlessly handle the most difficult and heavy loads even when operating at full capacity.

In the diesel-powered models, the tough, electronically controlled common rail Stage V engine allows each cylinder to work at peak efficiency regardless of load and speed. It also contributes to the truck's exceptionally low noise, vibrations, emissions and fuel consumption.

The rotary fuel pump allows easy maintenance while protecting the engine.

The GP40-GP55N models are equipped with a GCT GK45 LPG engine with standard catalytic converter that delivers good performance, excellent fuel economy and low emissions, as well as low noise and vibration levels.

The compact, smooth lines of each model ensure that they are easy to manoeuvre in confined spaces whilst ensuring good visibility. The excellence of the range is further boosted by a wide array of options that enable you to fine tune each truck to your work requirements.

UNCOMPROMISING PERFORMANCE...

DOWNLOAD
SPEC SHEET

4.0 - 5.5 TONNES

Rugged features and uncompromising quality
to meet productivity challenges in the heavy-duty environment.

STANDARD FEATURES

- Highly regarded, market-proven industrial diesel Stage V and LPG engines give excellent performance.
- Full floating power line featuring two forward speeds and one reverse with high gradeability and travel speed.
- LCD multi-functional display with indicators providing all safety functions. The display also indicates service requirements to prevent unexpected down time and cost due to unscheduled maintenance and service.
- Specially positioned air intake system which lengthens the life of air intake filters, reducing maintenance.
- PDS+, presence detection system disengages drive and hydraulic functions when the operator's seat is vacated.
- Handgrip mounted at the rear of the overhead guard with a horn button increases safety and reduces back strain and fatigue in applications with repetitive reversing.
- LED lights on the front work lights and front/rear combination lights reduce energy consumption and maintenance costs.
- Adjustable steering column for comfortable operation for a wide variety of operators.
- Automotive style brake system, self energising and self adjusting.
- Catalytic converter to further reduce exhaust emissions. (LPG only).

OPTIONAL FEATURES

- Fingertip hydraulic controls mounted on a fully adjustable armrest for optimum load handling and easy maneuverability.
- Deluxe cabin options.
- Hydraulic valves and piping to control auxiliary attachments.
- Pre-cleaner air intake option to adapt the truck to harsh applications.
- Elevated exhaust, catalytic converter and spark arresting cyclone muffler exhaust options.
- Coolant level warning, anti clogging radiator and "easy to clean" dust proof net cooling options to cope with dusty and dirty applications.
- Tyre options: Solid Pneumatic tyres and dual tyres for even better capacity or lower ground pressure.
- Pro-Shift transmission abuse protection system.
- Low maintenance oil cooled wet disc brakes.

Although tough enough for the hardest task the larger models have the feel of a small truck, which makes them easier to drive and more efficient in the workplace.

A small steering wheel, hydrostatic steering system, easy hydraulic control and low impact brakes take the effort out of driving, leaving the operator to concentrate on the job in hand.

COMFORT IN ALL ENVIRONMENTS

FACTORY-FITTED CABIN

In extreme weather conditions keep your operators comfortable and productive, with our factory-fitted cabin option. These keep the elements out, without compromising visibility. Our cabs combine form and function and are designed to keep the truck performing in the most extreme of temperatures and in wet environments.

PANEL CABINS FEATURES

- Laminated glass front window with 2 speed wiper/washer and overhead guard with a roof shield.
- Tempered glass rear window with wiper/ washer.
- Lockable steel doors featuring a sliding window in each door. The doors are fully lined and the roof panel is covered for even better insulation.
- Integrated heating system.
- Audio preparation (antenna and wiring).

SUPERIOR COMPONENTS, SUPERIOR SERVICEABILITY...

Careful selection of high quality parts and attention to detail in the design of every component make Cat lift trucks the most durable you can buy, but every vehicle must be properly serviced if it is to provide years of uninterrupted duty.

That's why we have taken care to create trucks that are easy and quick to maintain.

Access to all major parts is rapid and unobstructed, with engine hoods and floorplates that can be easily removed to attend to routine and unscheduled maintenance.

All service check points can be easily located. This aspect of ownership is frequently overlooked but it is what makes our trucks renowned for their productivity and low operating costs.

Features designed to improve service and repair efficiency

- Comprehensive instrument panel
- High capacity cooling system ensures cool running and long engine life.
- Hydrostatic steering axle contains few moving parts for long life.
- High air intake draws cleaner air extending the maintenance intervals of the filter.
- Interchangeable parts means fewer part needs and lower stock costs.
- High capacity oil pumps increase lubrication and cooling to protect components.
