Idle time. Fuel burn. Parts replacement. Maintenance visits.
In today's operations, expenses just keep adding up — and up and up.
Drive them down with Cat Technology and help you minimize unplanned downtime, fuel consumption, service travel and early failures.
You'll see exactly where your money goes, where it's being used effectively and where you can potentially cut costs.

CONTROL COSTS

+ Find and eliminate unproductive idle time to reduce fuel costs.

+ Limit total engine hours to increase time between overhauls.

+ Spot and fix small problems before they become major repairs.

+ Keep up with maintenance schedules to maximize asset life.

OPERATE EFFICIENTLY

+ Identify the best time to schedule service or repairs.

+ Manage each asset's logistics throughout its use cycle.

+ Decide whether you can take an asset off a job and still meet deadlines.

REDUCE RISKS

+ Maintain regulatory compliance to avoid fines and complications.

+ Receive fault codes on your mobile device and troubleshoot remotely.

+ Get accurate feedback on how safely and efficiently your operations are running.

Cat® Remote Asset Monitor is our award-winning fleet management software which gathers data generated by your gensets and serves it up to you in easy-to-digest bites.

If you're ready to earn more from your generator sets – reduce downtime, increase reliability and profit-making potential, we have the experience and expertise to help.
